In expression for $I_{\text{leak}}$ in Eq. (42), the coefficient 16/3 should be replaced by 8/3. In Eq. (45) (last two lines), (45'), and (45") all the terms with the exception of $V/R$ must be multiplied by $j$. The expression for $\alpha(V)$ at $T \ll \Delta$ should take the form

$$\alpha(V) \sim 2 \left\{ \frac{V}{16 \pi} \right\} \left( \frac{V}{2 \pi} \right)^{\frac{1}{2}} \left( 1 - \frac{\sqrt{2}}{3} \right) \left( e^{2V/\Delta} - 1 \right).$$

The value of $\alpha(V)$ at $T \ll \Delta$ and $(1 + 4\Delta/3\pi)^{1/2}$ at $T \gg \Delta$.
